

文延欢第二章作业

(一) 多选题的界面效果

核心代码:

```
public class MainActivity extends AppCompatActivity implements
CompoundButton.OnCheckedChangeListener {
    private final ArrayList<String> mHobbies = new ArrayList<>();
    @SuppressWarnings("SetTextI18n")
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        final TextView resultTextView =
findViewById(R.id.text_view_result);
        CheckBox checkBox1 = findViewById(R.id.check_box1);
        CheckBox checkBox2 = findViewById(R.id.check_box2);
        CheckBox checkBox3 = findViewById(R.id.check_box3);
        CheckBox checkBox4 = findViewById(R.id.check_box4);
        Button submitButton = findViewById(R.id.button_submit);
        //CheckBox 设置监听器
        checkBox1.setOnCheckedChangeListener(this);
        checkBox2.setOnCheckedChangeListener(this);
        checkBox3.setOnCheckedChangeListener(this);
        checkBox4.setOnCheckedChangeListener(this);
        //Button 设置监听器
        submitButton.setOnClickListener(v -> {
            StringBuilder sb = new StringBuilder();
            for (int i = 0; i < mHobbies.size(); i++) {
                //选择的兴趣爱好添加到StringBuilder 尾部
                if (i == (mHobbies.size() - 1)) {
                    sb.append(mHobbies.get(i));
                } else {
                    sb.append(mHobbies.get(i)).append(", ");
                }
            }
            //显示选择结果
            if (sb.length() == 0) {
                resultTextView.setText("您还没有进行选择了!");
            } else {
                resultTextView.setText("您选择了: " + sb + "。");
            }
        });
    }
}
```

```

@Override
public void onCheckedChanged(CompoundButton compoundButton,
boolean isChecked) {
    if (isChecked) {
        // 添加到数组
        mHobbies.add(compoundButton.getText().toString().trim());
    } else {
        // 从数组中移除
        mHobbies.remove(compoundButton.getText().toString().trim());
    }
}
}

```

可以对选框中的数据进行选择，如果选择并提交，会在下方显示所选内容。如果没有选择，那么会出现提示内容。运行结果如下所示：

开始界面

已选择并提交

未选择并提交

(二) 选择出生日期的界面效果

核心代码：

```
protected void showDatePickDlg() {
    Calendar calendar = Calendar.getInstance();
    DatePickerDialog datePickerDialog = new
    DatePickerDialog(MainActivity.this, new OnDateSetListener() {

        @Override
        public void onDateSet(DatePicker view, int year, int
        monthOfYear, int dayOfMonth) {
            MainActivity.this.mEditText.setText(year + "-" +
            monthOfYear + "-" + dayOfMonth);
        }
    }, calendar.get(Calendar.YEAR), calendar.get(Calendar.MONTH),
    calendar.get(Calendar.DAY_OF_MONTH));
```

```
datePickerDialog.show();  
}
```

选择日期界面

将日期选择为 20030402

日期结果显示
