

第五章：

p150 5.1 实现登录后显示用户名的效果。输入用户名、密码后登录，启动一个新的 **Activity** 显示用户名。

1、运行界面：

2.部分代码:

①登录界面 java 代码:

```
public class MainActivity2 extends AppCompatActivity {
    private TextView usernameTextView;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main2);
        usernameTextView = findViewById(R.id.username);
        String username = getIntent().getStringExtra("username");
        usernameTextView.setText("欢迎登录 " + username + "!");
    }
}
```

②验证登录用户名密码 java 界面:

```
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity_main);
    usernameEditText = findViewById(R.id.username);
    passwordEditText = findViewById(R.id.password);
    loginButton = findViewById(R.id.login);
    loginButton.setOnClickListener(new View.OnClickListener() {
        @Override
        public void onClick(View v) {
            String username = usernameEditText.getText().toString();
            String password = passwordEditText.getText().toString();
            if (username.equals("lmx") && password.equals("2003lmx")) {
                Intent intent = new Intent(MainActivity.this, MainActivity2.class);
                intent.putExtra("username", username);
                startActivity(intent);
            } else {
                // 提示用户登录失败
            }
        }
    });
}
```

③登录界面的 XML 文件:

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    tools:context=".MainActivity">
```

```
<EditText
    android:id="@+id/username"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:hint="用户名: " />
<EditText
    android:id="@+id/password"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    android:hint="密码: "
    android:inputType="textPassword"
    android:minHeight="48dp" />
<Button
    android:id="@+id/login"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_marginLeft="150dp"
    android:text="登录" />
</LinearLayout>
```
