

第二章

2.2 实现多选题的界面效果。

MainActivity.java

```
final TextView resultTextView = findViewById(R.id.text_view_result);
CheckBox checkBox1 = findViewById(R.id.check_box1);
CheckBox checkBox2 = findViewById(R.id.check_box2);
CheckBox checkBox3 = findViewById(R.id.check_box3);
CheckBox checkBox4 = findViewById(R.id.check_box4);
Button submitButton = findViewById(R.id.button_submit);
//CheckBox 设置监听器
checkBox1.setOnCheckedChangeListener(this);
checkBox2.setOnCheckedChangeListener(this);
checkBox3.setOnCheckedChangeListener(this);
checkBox4.setOnCheckedChangeListener(this);
//Button 设置监听器
submitButton.setOnClickListener(v -> {
    StringBuilder sb = new StringBuilder();
    for (int i = 0; i < mHobbies.size(); i++) {
        //选择的兴趣爱好添加到StringBuilder 尾部
        if (i == (mHobbies.size() - 1)) {
            sb.append(mHobbies.get(i));
        } else {
            sb.append(mHobbies.get(i)).append("、");
        }
    }
    //显示选择结果
    if (sb.length() == 0) {
        resultTextView.setText("您还没有进行选择!");
    } else {
        resultTextView.setText("您选择了: " + sb + "。");
    }
});
```

2.3 实现选择出生日期的界面效果。

MainActivity.java

```
DatePickerDialog.OnDateSetListener listener1 = new
DatePickerDialog.OnDateSetListener() {
    @Override
    public void onDateSet(DatePicker view, int year, int month, int
dayOfMonth) {
        TextView tvBirthDate = findViewById(R.id.tvBirthDate);
        tvBirthDate.setText("出生日期为: "+String.valueOf(year)+"年
"+String.valueOf(month+1)+"月"+String.valueOf(dayOfMonth)+"日");
    }
};
findViewById(R.id.btnBirthDate).setOnClickListener(new
View.OnClickListener() {
    @Override
    public void onClick(View view) {
        DatePickerDialog dpd=new
DatePickerDialog(MainActivity.this,listener1,2003,4,3);
        dpd.show();
    }
});
```

```
}  
});
```
