

## 第八章:

p271 8.1 使用 Camera2 实现定时拍照的功能。

```
private Runnable timerRunnable = new Runnable() {
    @Override
    public void run() {
        if (mCurrentTimer > 0) {
            mTvCountDown.setText(mCurrentTimer + "");

            mCurrentTimer--;
            mHandler.postDelayed(timerRunnable, 1000);
        } else {
            mTvCountDown.setText("");

            mCamera.takePicture(null, null, null, MainActivity.this);
            playSound();

            mIsTimerRunning = false;
            mCurrentTimer = 8;
        }
    }
};
```
